THE NEW

EU General Data Protection Regulation (EU GDPR)

WHAT IS THE GDPR?

It is a new regulation 📑

which aims to strengthen

data protection rights for individuals within the European Union. ----- It replaces the 1995 directive and aims to

future-proof

data protection in the EU, whilst also unifying various national laws.

:-> The GDPR will also apply to non-EU

organisations which process data of EU residents.

When will these changes take place?

2016 Adoption of the new regulation. Businesses have 2 years to comply Adoption of the new

2018 and strict enforcement of the EU GDPR

Complete implementation

From 2018 onwards companies should use state-of-the art security to protect personal data

In case of a data breach businesses may face fines of up to 4% of their annual global revenue or €20 million (whichever is greater) and must inform their national supervisory authority

Studies

The average cost of a data breach increased by 23% since 2013

€3.7m

The average cost of a data breach for large organisations in the EU

The highest costs occur in the

HEALTH, EDUCATION & FINANCIAL SECTORS

Steps to becoming **GDPR** compliant

Understand the new

regulation and what it means

Evaluation

Understand who uses and has access to data Policy

Define your strategy for data on the move

Technology

Consider hardware encryption and endpoint-management options

Education

Ensure your staff are aware of the GDPR, and best practice data protection policies

A SMALL USB CAN CAUSE A LOT OF TROUBLE

Employees carrying data out of the office increase the risk of data being **compromised.** -----

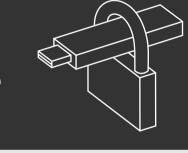

open to **hefty fines**, recovery costs and a potential PR disaster. -----

Leaving a company

apply to data you not only **need** to protect, but want to protect.

Encryption is the best way to be safe. Kingston encrypted products minimize the

risks of moving data on USB drives and ensure your critical and sensitive data is protected.

Did you know?

on it is **encrypted** then this is a **SECURITY**

If a USB is lost or stolen and the data

BREACH

Kington and IronKey USB drives
