

Kingston / Ironkey Encrypted USB Advantage Over BitLocker

MICROSOFT'S BITLOCKER 	KINGSTON / IRONKEY ENCRYPTED USB 
Feature	Kingston Advantage
<p>1. Limited compatibility between OS:</p> <ul style="list-style-type: none"> - ONLY available in the Enterprise & Ultimate editions of Windows 7 Pro & Enterprise editions of Windows 8.1 Windows 10 - Does not support Mac OS <p>2. Issues with OS patches / system updates</p> <ul style="list-style-type: none"> - Buggy updates - delays between fixes <p>3. Vulnerable to "ROCA"</p> <ul style="list-style-type: none"> - Cryptographic flaws in BitLocker - 'Worse Than KRACK' - Google and Microsoft Hit by Massive 5-Year-Old Encryption Hole 	<p>1. Better compatibility between OS:</p> <ul style="list-style-type: none"> - Windows® 10 Windows 8.1 Windows 8 Windows 7 (SP1) Mac OS X v. 10.10.x - 10.13.x Linux Kernel v. 2.6. <p>2. Not affected by "ROCA" attacks</p>
<p>1. Software-based encryption</p> <ul style="list-style-type: none"> - Runs on host computer <p>2. Easier vulnerability attacks</p> <ul style="list-style-type: none"> - Open to keylogging, sniffing, memory/hash attacks 	<p>1. Hardware-based encryption</p> <ul style="list-style-type: none"> - Fully self-contained protection <p>2. No software vulnerability attacks</p> <ul style="list-style-type: none"> - Eliminates sniffing and memory hash attacks <p>3. Digitally-signed firmware</p> <ul style="list-style-type: none"> - Cannot be altered <p>4. Physical layer of protection</p> <ul style="list-style-type: none"> - Epoxy dipped/filled cases prevent access to physical memory
<p>1. Susceptible to brute force attacks</p>	<p>1. 10-attempt brute force protection</p> <ul style="list-style-type: none"> - Wipes the drive clean or disables it <p>2. Prevent anyone from getting your sensitive data if USB drive is lost or stolen</p>
<p>1. MIS/IT administrator-intensive</p>	<p>1. Minimal MIS efforts - Easy to deploy</p>
<p>1. Uses older technology standards for USB</p> <ul style="list-style-type: none"> - 256-bit AES, CBC (previous standard) - FIPS-compliant (not certified) <p><i>Note: Drives encrypted with XTS-AES will not be accessible on older versions of Windows.</i></p> <p>Removable drives should continue to use AES-CBC 128-bit or AES-CBC 256-bit algorithms.</p>	<p>1. Kingston uses latest technology standards</p> <ul style="list-style-type: none"> - 256-bit AES, XTS (highest standard) - FIPS 197 and 140-2 Level 3 "Certified" - EU GDPR compliant - NYDFS - 23 NYCRR 500 compliant - TAA compliant

Overall, Kingston / IronKey Encrypted USB Drives prove to be the best solution in reliability, compatibility and security for portable data protection solutions. They are 100% compliant with regulations and standards | Works with endpoint security for DLP needs | No software/drivers needed | Designed for quick and efficient deployment.
