## Declaration of Conformity for California Proposition 65

Kingston Solutions Inc. (“Kingston”) hereby declares that Kingston is fully aware of the current obligations of California Safe Drinking Water and Toxic Enforcement Act of 1986.

California Safe Drinking Water and Toxic Enforcement Act of 1986, known as Proposition 65 or “Prop 65”, aims to protect the state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects, or other reproductive harm, and requires businesses to inform Californians about exposures to such chemicals.

Kingston’s products have been reviewed that the anticipated exposure level will not pose a significant risk of cancer or is significantly over safe harbor levels observed to cause birth defects or other reproductive harm in accordance with California’s Safe Drinking Water and Toxic Enforcement Act of 1986.

Notwithstanding the foregoing, Kingston reviews its suppliers’ certifications, material content research, and confidentially disclosed chemicals and materials information. Based on this third-party information, Kingston has determined to the best of its knowledge and belief that certain Kingston products may contain one or more of the chemicals on the Prop 65 List. If present, these chemicals are not intended to be exposed to users, nor are they intended to be released or discharged during normal product use. If after reviewing available material content information and our products we determine an exposure requiring a Prop 65 warning may exist, Kingston will provide the necessary “clear and reasonable” warning.

Kingston’s products are currently within the “no significant risk” range, and not harmful when normally used. This declaration covers Kingston’s flash products.
