

CUSTOMIZATION PROGRAM

Kingston's Customization Program gives companies the option to use quality DataTraveler® and IronKey™ USB drives to personalize and promote their brand.

Some options include:

- Logo Printing
- Content load of digital files
- Custom packaging
- Custom casing

Contact your Kingston representative to learn more today!

USB 3.x

DataTraveler Exodia		
	Logo imprint dimension:	23.0mm x 6.5mm
	Casing Color:	Black
	<input type="radio"/> 64GB Black with Teal Key Ring <input type="radio"/> 128GB Black with Yellow Key Ring <input type="radio"/> 256GB Black with Pink Key Ring	
DataTraveler Exodia M		
	Logo imprint dimension:	23.0mm x 14.0mm
	Casing Color:	Black
	<input type="radio"/> 64GB Black with Blue Cap <input type="radio"/> 128GB Black with Red Cap <input type="radio"/> 256GB Black with Teal Cap	
DataTraveler Kyson		
	Logo imprint dimension:	14.5mm x 7.0mm
	Casing Color:	Metal
	Logo:	Laser etch only, no color
DataTraveler SE9G3		
	Logo imprint dimension:	15.8mm x 7.0mm
	Casing Color:	Metal, gold
	Logo:	Laser etch only, no color

CUSTOMIZATION PROGRAM

**ENCRYPTED
USB 3.x**

IronKey Vault Privacy 50 Series (IKVP50, IKVP50C)		
	Logo imprint dimension:	32.5mm x 10.0mm
	Casing Color:	Blue Metal (default)
	Logo:	Laser etch only, no color
	Hardware Encryption	LED Activity Indicator
	25-piece minimum order QTY	
IronKey D500S (IKD500S)		
	Logo imprint dimension:	40.0mm x 10.0mm
	Casing Color:	Black Metal (default)
	Logo:	Laser etch only, no color
	Hardware Encryption	LED Activity Indicator
	25-piece minimum order QTY	
IronKey Locker+ 50 (IKLP50)		
	Logo imprint dimension:	21.0mm x 8.0mm
	Casing Color:	Metal
	Logo:	Laser etch only, no color
	Hardware Encryption	LED Activity Indicator
	25-piece minimum order QTY	
IronKey Keypad 200 Series (IKKP200, IKKP200C)		
	Logo imprint dimension:	70.0mm x 6.50mm
	Casing Color:	Blue (default)
	Logo:	Laser etch only, no color (Logo only on narrower side of sleeve)
	Hardware Encryption	LED Activity Indicator
	25-piece minimum order QTY

CUSTOMIZATION PROGRAM FAQs

What is a vector-based file?

A vector-based artwork file is an image made up of lines rather than pixels. When the artwork image is scaled up to a larger size, the vector-based file will not lose any clarity and produce a high-quality printable image at any zoom or upscale. A pixel-based image file will show rough and blurry edges and lines, and produce low quality material when printed.

Can I convert my .jpeg or .tif file into a vector-based file?

No, a true vector-based image is created using lines from its inception. When a low quality image file, such as a .jpeg, is converted to vector-based artwork, it is not a true vector-based file and quality will remain low and unusable.

How do I obtain a vector-based file?

You must use Adobe Illustrator (or similar program) to produce vector-based artwork files such as .ai or .eps.

What if I don't have access to Adobe Illustrator?

Unfortunately, Adobe Illustrator (or similar programs) is the only way to truly create a vector-based file. We suggest you consult with your design team.

What type of image is ideal for printing?

Avoiding very fine lines and/or very small text/images is strongly recommended. Small, intricate artwork and thin lines do not always produce with the best quality.

What Co-logo processes does Kingston use?

Kingston will use one of three processes for logo printing, depending on the USB casing material and/or color and logo color(s).

• Pad Printing

Pad printing deposits a design onto a three-dimensional object using a silicone pad that lifts the ink off a printing plate. It works much like a stamp.

Ideal for: Simple artwork with 4 colors or less

• Digital Printing

Digital printing does not require stencils and functions much like a computer printer. Artwork is loaded into a computer and a digital-based image is printed directly on the objects.

Ideal for: Artwork with a high number of colors and/or details. Used in conjunction with white or light-colored casing.

• Laser Etching

Laser etching is the process of using laser to engrave or mark on objects. It is done by using a machine that emits laser beams.

Ideal for: Monotone design on metal surfaces

USB Type-C® and USB-C® are registered trademarks of USB Implementers Forum.

Some of the listed capacity on a Flash storage device is used for formatting and other functions and thus is not available for data storage. As such, the actual available capacity for data storage is less than what is listed on the products. For more information, go to Kingston's Flash Guide at kingston.com/flashguide.
